Identified Problems

The issue of the wires arranged are random and cause of loose connection

Solution

We can place a proper channel and insulation for all the wires together so that no wires touches the student in case of any insulation issue of the wire due to bending this also allows the student to sit comfortably

In all a single big tube can be placed so that all wires can be put into it.

FIRE ORDER

- Alert The Security At Security Room By Activating Remote Call Point Located At Strategic Locations.
- Evacuate The Occupants By Using Fire Exits And Emergency Exits Only And Assemble At Various Assembly Points.
- If Possible Try To Extinguish The Fire By Using Fire Extinguishers / Suitable Portable Extinguishers Or Water From Nearest Water Source.
- Be Calm And Do Not Give Any Reason For Panic, Worry, Do Not Run.
- If You Encounter Serious Difficulty In Evacuation, Flag And Try To Attract Attention Of Rescue Team.
- ACTION BY SECURITY / RECEPTION UPON RECEIPT OF INFORMATION THROUGH FIRE ALARM OR ANY OTHER SAFETY MEANS
- Alert The Occupants by Using Public Address System
- Inform Fire Control Room by Dialling No. 101
- Assist the Person Inside the Building For Evacuating to Assembly Point

Identified Issue:

The writings are too small to read in case of an emergency situation and is placed inside the block.

Solution

Better to keep the letters big enough and place it outside the entrance where the people entering the building can read it once they enter and other fire order alerts be placed inside

Identified Issue

The Lift for the faculty, students and the shop is placed so close that it can cause a crowd in the rush hours.

Also, the separator can be placed for going out and in near the lift so it can be easier for people to get in and get out.

Solutions

The shop and the 3 sets of lifts should be placed in separate areas to control the crowd as it can be easy for students to reach the lifts.
